OVERVIEW

Total Education Solutions Provider

Schools must position themselves as the place where students want to learn. Ever-changing technologies coupled with shrinking budgets make technology upgrades more important and more challenging than ever before. Cables To Go takes a holistic approach to meet the demanding requirements of the education market.

We Offer:

- Solutions to match any budget, timeframe, or lead-time
- Future upgrade capabilities
- Classic design for smaller projects
- Premium design that reduces installation time and cost
(Save time to save money)

We
PROVIDE
Solutions!

CLASSIC SERIES

Standard A/V Connectivity Solution

Cables To Go realizes that some A/V needs require a simple, cost effective option. To this end, Cables To Go has introduced the Classic Series of A/V wall plates and plenum-rated cables. The Classic Series sets the standard in traditional A/V cabling. Available off-the-shelf with industry leading lead times, our Classic Series of education solutions is designed to provide uncompromised signal integrity.

The wall plates are constructed of durable, air-craft grade brushed aluminum and feature feed-through connectors in various combinations designed specifically for the needs and requirements of the education market. Plenum-rated cables are available in multiple formats and lengths, featuring compact connectors that save space in wall boxes.

Single Gang HD15 VGA + 3.5mm + Composite Video + Stereo Audio Wall Plate

RAPIDRUN®

The Complete A/V Connectivity Solution

- Saves time and money
- Offers high performance and quality
- Easy upgrades
- Single cable, multiple signals
- No more field termination!

Schools everywhere are upgrading and adding new classrooms, conference rooms and digital signage. Architects and integrators are tasked with meeting the needs of today while preparing for the ever-changing education facilities of the future. RapidRun can help!

Designed to carry multiple signals over a single cable, including VGA, Composite Video, S-Video, Component Video or HDMI and DVI, RapidRun cuts initial installation to a fraction of the time it takes to field terminate. In addition, future upgrades are fast and easy.

A wide assortment of Wall Plates and Flying Leads specifically designed for the education market make RapidRun the perfect fit for most education environments.

— Fast And Easy!

WIRELESS SOLUTIONS

Add Flexibility To Any Teaching Environment

Classroom environments demand flexibility. Students and teachers need the ability to print, scan, back up files, and more while not being tied down to a computer or peripheral. The TruLink® line of Wireless USB products provides a secured connection between your computer and the hub allowing you to connect USB devices and access them wirelessly up to 30ft away.

TruLink Wireless USB to VGA Adapter Kit

USB SUPERBOOSTERS

Break The Limitations Of USB

Cables To Go offers a line of USB SuperBoosters that provide a very simple and clean solution for any education need. These SuperBoosters extend the distance of a USB device to a host computer up to 150ft so that the projector, interactive whiteboard, camera, printer, or any other USB device can be placed exactly where they are needed.
